

Fundamentals of Statistical Process Control

James R. Evans

AMERICAN MANAGEMENT ASSOCIATION

Contents

About This Course	ix
How to Take This Course	xi
1 Introduction to Statistical Process Control	1
Total Quality Management and Statistical Process Control	
Statistical Process Control	
Quantifying Variation	
Approaches to Continuous Improvement	
The Deming Cycle	
Juran's Improvement Program	
Summary	
Review Questions	
2 Statistical Tools for Problem Solving	19
Statistical Thinking	
Measurement and Data Collection	
Types of Data	
Accuracy and Precision	
Populations and Samples	
Sampling Issues	
Fundamental Statistical Measures	
Measures of Central Tendency	
Measures of Variation	
Tools for Data Collection and Analysis	
Flowcharts	
Check Sheets	
Histograms	
Pareto Diagrams	
Cause-and-effect Diagrams	
Scatter Diagrams	
Control Charts	

Summary

Review Questions

3 Introduction to Control Charts 37

The Scope of Statistical Process Control

Measurement and Control

Advantages of Control

Standards and Goals

Process Measurement

Corrective Action

Run Charts

Constructing Run Charts

Run Chart Example

Interpreting Patterns in Run Charts

Trends

Shifts in Level

Cycles

Spikes

Multiple Variable Run Charts

Control Charts

Computing Control Limits

Using Control Charts

Implementing Statistical Process Control

Summary

Review Questions

4 Control Charts for Variables Data-Part I 55

Variables Control Charts

Constructing \bar{x} - and R -charts

Evaluating the State of Control

Interpreting Patterns in \bar{x} - and R -charts

Using Control Charts for Continued Monitoring

Maintaining Control Charts

Fundamental Design Issues

Basis for Sampling

Sample Size

Sampling Frequency

Summary

Review Questions

5 Control Charts for Variables Data-Part II 75

Alternatives to \bar{x} - and R -charts

Constructing Standard Deviation Charts

Example of Standard Deviation Calculation

Charts for Individual Measurements	
Individual Measurements and Moving Ranges Example	
Selecting the Proper Variables Control Chart	
Summary	
Review Questions	

6 Control Charts for Attributes Data 89

Attributes Measurement and Control Charts	
<i>p</i> -chart for Fraction Defective	
Calculating the Proportion Nonconforming	
<i>np</i> -chart for Number Nonconforming	
Example of an <i>np</i> -chart	
<i>p</i> -chart with Variable Sample Sizes	
Constructing a <i>p</i> -chart with Variable Sample Sizes	
Approximate Control Limits	
Calculating Approximate Control Limits	
Variable Sample Sizes and <i>np</i> -charts	
Charts for Defects	
Constructing a <i>c</i> -chart	
Constructing a <i>u</i> -chart	
Example of a <i>u</i> -chart	
Selecting Attributes Control Charts	
Using the <i>c</i> -chart	
Using the <i>u</i> -chart	
Summary	
Review Questions	

7 Process Capability 109

The Concept of Process Capability	
Variation and Specifications	
Capability and Control	
Process Capability Studies	
Measuring Process Capability	
Estimating Process Capability from Descriptive Statistics	
Example of Descriptive Statistics	
Estimating Process Capability from Control Charts	
Process Capability Index	
One-sided Process Capability Indexes	
<i>C_{pk}</i> Example	
Summary	
Review Questions	

Appendix	123
Bibliography	127
Post Test	129
Case Study	
Selected Readings	
Index
